Specifications	
Capacity	5 x 250mm Cylinder
Dimensions	2130x60x115 mm

These are wall brackets for five cylinders of compressed gas. Constructed of galvanized sheet metal for corrosion resistance they are designed to safely secure the cylinders to the wall. It is important that there is no comprimise to safety. It is extremely important that compressed gas cylinders are stable during storage to avoid the dangers of cylinders falling to the ground, with this product the bottles are fastened with a chain to restrict movement. This gas cylinder bracket can store upto 5 cylinders. If wanting multiple units please call us for a discount.
